Eirich Machines offers a full refurbishment program for both our APS and EIRICH R/D Series product lines. This program ensures that your mixer/blender will operate at OEM-designed performance and maximum capacity.

Our capabilities

- Replacement of original parts or upgraded parts
- Exterior or internal polishing, and exterior coatings
- In-house engineering, utilizing worldclass 3D software
- In-house testing of critical components (e.g., shaft straightness and dye penetrant tests, discharge gate functionality/sealing, electrical function of motors)

Refurbishment benefits

- Faster turnaround time from start to finish
- Installation and commissioning time minimized thanks to merely updating an original configuration
- An economical option if the budget is limited
